

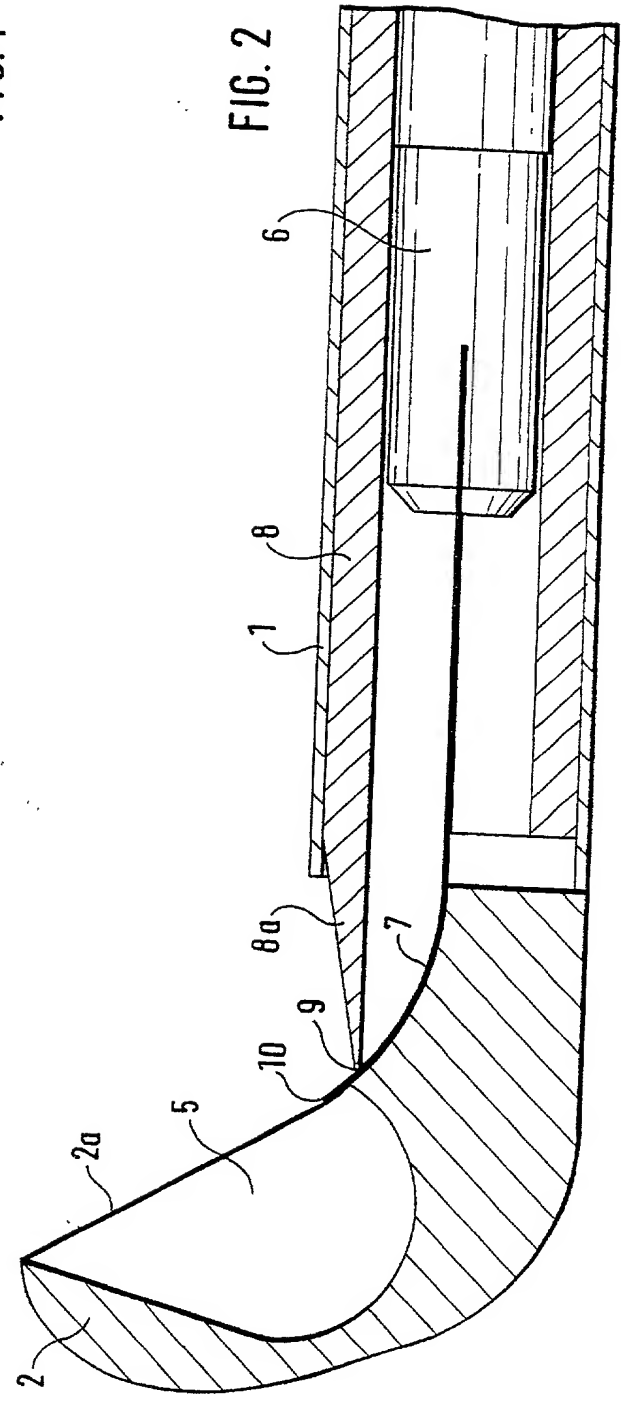

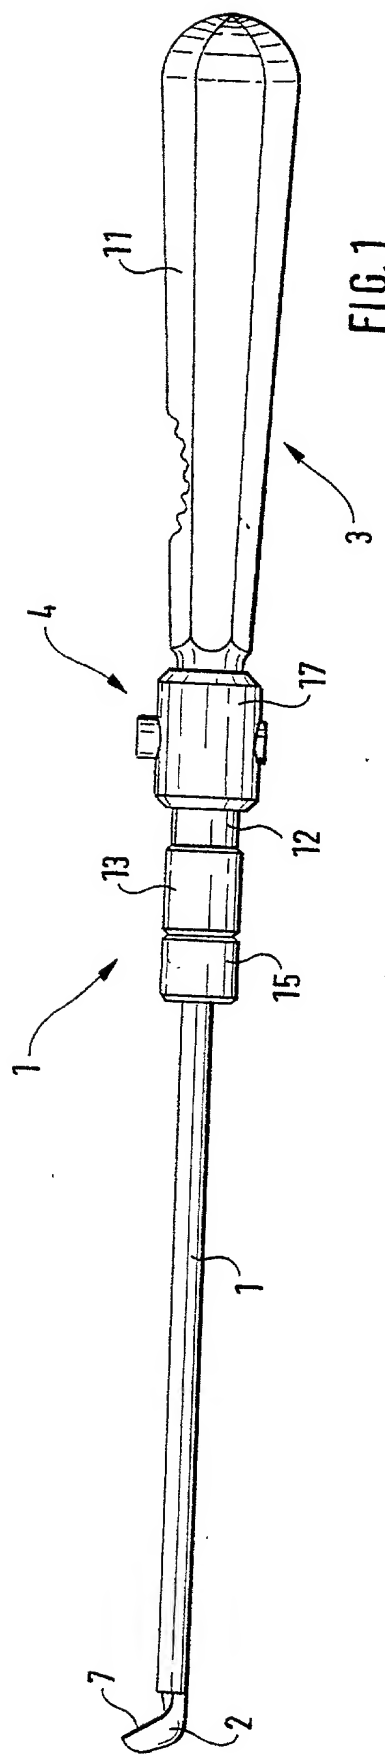

FIG. 1 is a perspective view of a surgical instrument 1, including a handle 2, a shaft 3, and a tip 4. The handle 2 includes a proximal end 5 and a distal end 6. The shaft 3 includes a proximal end 7 and a distal end 8. The tip 4 includes a proximal end 9 and a distal end 10. The handle 2 is connected to the shaft 3 at the proximal end 7. The shaft 3 is connected to the tip 4 at the distal end 8. The handle 2 is made of a material that is biocompatible and has a smooth surface. The shaft 3 is made of a material that is biocompatible and has a smooth surface. The tip 4 is made of a material that is biocompatible and has a smooth surface.
